REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-9 are allowed as the prior art does not teach or suggest the applicant's invention. Specifically, Deng et al. (US 6,493,176), Yatsu (US 6,738,215), or Yarmchuk (US 6,344,942) fail to teach a method for setting an initial servo track pitch. The distinguishing elements of the claims teach changing a bias voltage applied to a secondary actuator by a predetermined bias voltage increment for a predetermined number of times to change the position of a read/write head a corresponding number of times and writing a burst pattern on at least one hard disk at each respective changed position of the read/write head; determining an amount of overlap for at least one selected burst pattern having two burst patterns that are adjacent to the burst pattern; terminating the method for setting the initial servo track pitch when the amount of overlap determined for each selected burst pattern is within a selected criterion of a predetermined target overlap value; increasing the predetermined bias voltage increment when the amount of overlap for each selected burst pattern is greater than the predetermined target overlap value, and decreasing the predetermined bias voltage increment when the amount of overlap for each selected burst pattern is less than the predetermined target overlap value; and repeating the steps with the new predetermined bias voltage increment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
